Dear Joshua,

enclosed please find a manuscript, dealing with the material of the seminar given in your Department this X-mas. Since at that time some points were not clear, because of the lack of available experiments, I thought you may be interested to see this work in a more complete form.

Would you be so kind and also give this text to Paul Berg, to whom I am particularly indebted, because of his keen interest in some biochemical problems related to our discourse.

Let me thank you again for the opportunity to visit you and for our intellectual encounter.

With warm regards
Yours truly

P.S. The ms. is presented to the Natl. Acad. in April.
Could you please have the text returned to me after you and Paul are finished with it.

Kun, E.
